BALTIC

Dance For Red Cross Benefit Well Patronized-Many Bathers in the Shetucket-Ten Sisters Professed at Local Convent.

A dance given in St. Jean's hall on and boiled as usual.
Saturday evening for the benefit of the Going to Red Cross was well attended. Harold Hannon of Hartford spent Sunday at his home on Depot Hill. The excessive heat of Sunday im-pelled many bathers to seek the shore of the Shetucket river.

Robert Walker, Arthur Jones, Joseph La Croix, George Douville, Ernest Erickson and Nelson Adams, motored to Wildwood park Saturday Ninety Sisters in Retreat.

About 30 Sisters of Charity from the Willimantic, Taftville and Baltic ommunities made the annual retreat communities made the annual retreat
July 9-18 at the Holy Family Academy. Baltic, Rev. J. E. McQuade, of
Holy Cross college Worcester, being
the preacher. At the close of the retreat, July 18, ten Sisters made their
solemn profession as religions. The
was an unusual event in Baltic as the
Sisters have hitherto been sent to
the Mother House in Tilburg, Holland,
for the profession ceremonies. The
Cremonies of reception were conductClarkes Earber. Saturday avening and ceremonies of reception were conducted by Right Rev. Monsignor T. S. Duggan in the absence of Bishop Nilan and he was assisted by Rev. John G. Murray the chancellor of the diocese. The remainder of the vacation the Sister teachers will spend in study the guests was a young man of vocal and reviews at discovery summer.

Mica Schist For Furnace Lining.

Mica schist is one of the commonest kinds of metamorphic rock and consists essentially of mica and quartz, with which may be associated certain other minerals, such as garnet and stauro-lite. Owing to its marked foliation, its softness and its generally unattrac-tive appearance, it has not been great-ly used as structural stone or as pay-ing or crushed stone. It was once quarried near Bolton, Conn. for use as Campbell, flagstone but it was too soft to with-Hepsley, stand the wear upon it in places of

> The mica to which the softness of mica schist is due, however, successfully withstands a very high tempera-ture, and as the stone can be readily cut into blocks of the desired shape. mica schist has therefore been used, considerably as furnace lining. The mica schist quarried for this use is found in eastern Pennsylvania at places conveniently near the metallurgical plants in which it is required. The quantity of mica schist produced for this purpose in 1917 was 39 975 short tons, an increase of 6,729 tons. or 20 per cent, over 1916, according to statistics compiled by G. F. Loughlin, of the United States Geological Survey, Department of the Interior. The value of the output in 1917 was

FATTENING THIN PEOPLE

Two Test Cases Show Gains of 23 and 27 Lbs., Respectively

Editor of "Physician's Who's Who's Makes Important Statement.

Judging from the countless preparations and treatments which are continually being advertised for the purpose of making thin people fleshy, developing arms, neck and bust, and replacing ugiy hollows and angles by the soft curved lines of health and beauty, there are evidently thousands of men and women who keenly feel their excessive thinness.

Thinness and weakness are usually due to starved nerves, Our bodies need more phosphate than is contained in modern foods. Physician's claim there is nothing that will supply this deficiency so well as the organic phosphate known among druggists as bitro-phosphate should be prescribed by Lee & Osgood and most all druggists under a guarantee of satisfaction or money back. By feeding the nerves directly and by supplying the body cells with the necessary phosphoric food elements, bitro-phosphate ouickly produces a welcome transformation in the appearance: the increase in weight also carries with it a general improvement in the health. Nervousness, sleeplessness and lack of energy, which nearly always saccompany excessive thinness, soon disappear, dull eyes become bright, and pale cheeks glow with the bloom of perfect health. Nervousness, sleeplessness and leak of energy, which nearly always saccompany excessive thinness, soon disappear, dull eyes become bright, and pale cheeks glow with the bloom of perfect health. Physicians and hospitals everywhere are now recognizing its merits by fits use in ever increasing quantities. Frederick Kolle, M.
